

Quick Guide to Reporting

how does it work?

TalentTracker® eRecruiter provides extensive **Management Reporting** to allow your business to make informed decisions in real time and to become a pro-active recruiter.

A comprehensive suite of over 20 reports provide a wealth of media, applicant, vacancy and diversity statistics to keep your business informed around the clock.

All management reports can be filtered down quickly and easily to meet your specific information requirements. We can also incorporate **Custom Reports** if your business has very specific requirements not covered by the suite of reports provided.

Your business can also export files easily if required to transfer data for use in other common applications.

applicant statistics

A suite of reports provide your business with information on how high or low your applications are for each vacancy - allowing you to react quickly and switch off vacancies or increase awareness of them.

Improve performance of your recruitment process with real time business intelligence

media reports

Help your business minimise advertising spends by accurately judging how effective your advertising has actually been. You can even shape the reports to your needs, for example reporting by job role giving you insight into what vacancies work in different media.

diversity reports

Diversity reports are designed to give your business valuable information to avoid discrimination and create a balanced workforce. These reports provide the evidence needed to fulfil statutory diversity requirements and prevent discrimination.

Statistics are available on the distribution of applicants by ethnic background, religion, community background, disability, sex and age.

TalentTracker® eRecruiter

Track the effectiveness of your recruiting efforts in real time

a host of flexible reports including

- Applications by job role
- Applications by location
- Applications by contract type
- Applications by current status
